A photograph showing a row of large, light-colored ceramic vases in a workshop. The vases are arranged in a line, receding into the background. They have a wide, flared top and a narrower base. The workshop has a wooden floor and a wooden ceiling with exposed beams. The lighting is warm and natural, coming from a window on the right.

Qui tutto parla il linguaggio
primordiale del fuoco: La terra
dall'imo come da mani ciclopiche, si strappa
in valloni profondi, ciechi
di nebbie fitte d'inverno
fumanti d'acque l'estate.

È questa la terra
di Faleri Veteres antica
che serra in seno gelosa il segreto del popolo senza patria:
già da millenni
camini di rustiche fucine
s'ergevano al cielo, prova
dell'opera umana.

E vasi preziosi, ed urne
dalla misteriosa tecnica perfetta
e simulacri e statue:
il genio etrusco.

Trascorse le rene
nella clessidra del tempo
fumano ora le ciminiere
prova dell'opera umana.
Ogni creta è pagina
della lunga storia della ceramica,
frammento
della infinita storia del mondo.

Dall'analisi della gestualità dell'utente contemporaneo nasce YUI, una collezione di lavabi che della spontaneità dei piccoli gesti quotidiani ne fa un punto di forza. Un piano sfalsato, dedicato appositamente alla protezione degli oggetti personali, è evidenziato da un segno deciso percepibile al tatto. L'ambiente assume diverse personalità, grazie ad un sistema di moduli, abbinabili al lavabo e studiati per ottimizzarne il trasporto.

The collection YUI, is born from the analysis of the gestures of the contemporary consumer; it is a collection of washbasins that makes of it point of strength the spontaneity of the small daily gestures. A split surface, devoted to the protection of the personal objects, is underlined by a definite sign identified by touch. The environment bath takes different personalities, thanks to a system of modules, combinable to the washbasin and studied for optimizing its transport.

AIDA

Serie / Series

Bordi sottili e ampi lavabi caratterizzano la serie Aida. Design e funzionalità si fondono per ottimizzare lo spazio e i volumi light si prestano per descrivere forme minimali dalle linee morbide e lineari. Completano la serie i sanitari a terra e sospesi a ridotto consumo di acqua.

Thin edges and large washbasins selected from the Aida series. Design and functionality merge to improve the space, and the volumes of light complement the minimal forms with soft and linear lines. The series can be floor mounted or suspended for reduced water consumption.

I sanitari sospesi sono scelti per il maggiore impatto estetico e per la semplicità di pulizia che garantisce il massimo dell'igiene.

The suspended fixture is chosen for the greatest aesthetic impact and for the simplicity of cleaning that guarantees maximum hygiene.

Negli ultimi anni l'arredo bagno ha visto la nascita di nuove tendenze e in particolare dell'utilizzo dei lavabi freestanding protagonisti soprattutto degli ambienti contemporanei. Il lavabo Aida freestanding rappresenta un'ottima scelta per arredare l'ambiente bagno.

In recent years the bathroom furniture has seen the birth of new trends, and in particular the use of independent prominent washbasins especially for contemporary environments. The self-supporting Aida washbasin is an excellent choice for decorating the bathroom.

Compatta e raffinata nella sua semplicità, la serie Aida è dedicata agli amanti del design moderno ed essenziale. È disponibile sia in versione a terra che sospesa, con e senza brida e scarico universale.

Compact and refined in its simplicity, the Aida series is dedicated to lovers of modern and essential design. It is available both in the floor mounted and suspended versions, with and without current and universal discharge.

Il vantaggio del vaso con scarico universale senza brida della serie Aida è indubbiamente di tipo estetico, ma è soprattutto nella pulizia e nell'ordine che si riscontrano risvolti pratici. Viene montato a filo muro per cui viene facilitata l'operazione di pulizia. L'assenza del bordo permette infatti di evitare la formazione di calcare e cattivi odori che possono derivare dall'accumulo della sporcizia. Un altro vantaggio è il flusso d'acqua pilotato: l'acqua dello scarico scorre con precisione lungo i bordi senza schizzi, pulendo l'intera superficie interna senza spreco d'acqua, con conseguente risparmio tangibile sui consumi. Il flusso d'acqua pilotato, inoltre, produce un rumore ridotto rispetto ai sanitari tradizionali, fattore molto rilevante per il comfort acustico degli ambienti adiacenti alle stanze da bagno.

The advantage of the Aida wc rimless with universal unloader is undoubtedly aesthetic, but it is above all cleanliness and order where practical implications are found. It is mounted flush to the wall to facilitate cleaning. The absence of an edge, in fact, avoids the formation of limestone and bad smells that can result from the accumulation of dirt. Another advantage is the controlled water flow: the drain water flows precisely along the edges without splashing, cleaning the entire inner surface without wasting water, resulting in tangible savings in consumption. The piloted water flow also reduces noise compared to traditional sanitary ware, a very important factor for the acoustic comfort of the rooms adjacent to the bathrooms.

Il lavabo LA1675 con le sue linee morbide e sinuose riesce a coniugare l'estetica e la praticità dell'alloggio rubinetteria.

The LA1675 washbasin, with its soft and sinuous lines, manages to combine the aesthetics and the practicality of the tap fittings.

Della serie Aida fanno parte i due lavabi sopra piano, uno con il troppieno integrato nella ceramica e l'altro, sebbene più grande di 3 cm rispetto al lavabo LA1930, è un ottimo compromesso salvaspazio. Grazie al troppopieno non carenato (al quale deve essere applicata una batteria di scarico) lo scasso nel mobile/top sarà circolare agevolando quindi l'installazione.

The Aida series includes two top-mounted washbasins, one with an overflow integrated in the ceramic, and the other; (although larger by 3 cm compared to the LA1930 washbasin); is a great space-saving compromise. Thanks to the non-faired overflow (to which a drain battery must be applied) the break-in in the cabinet / top will be circular, thus facilitating installation.

WC SOSPESO SENZA BRIDA

Unione di stile e funzionalità. Questo modello offre un perfetto connubio tra un design ricercato ed elegante e i vantaggi funzionali di un sanitario sospeso. Le linee armoniose e arrotondate lo rendono adatto per bagni dallo stile classico, ma anche in situazioni più moderne e con arredamenti minimalisti. La brida, ovvero l'incavatura del bordo da cui esce l'acqua per lo scarico del wc è sempre una zona che offre, notoriamente, grandi difficoltà di pulizia costringendo ad usare strumenti e prodotti specifici. In questo caso tutti i problemi svaniscono potendo pulire perfettamente ogni parte interna del wc. Altra caratteristica da non dimenticare è la particolarità del flusso di scarico, l'acqua fluisce con maggior forza e in maniera simmetrica riuscendo a pulire tutte le zone interne e assicurando la massima igiene: aspetto fondamentale per un bagno.

WC SUSPENDED NO-RIM

Union of style and functionality. This model offers a perfect combination of a sophisticated and elegant design with the functional advantages of a suspended sanitary ware. The harmonious and rounded lines make it suitable for classic style bathrooms, but also in more modern situations and with minimalist furnishings. The rim, is always a notoriously difficult area to clean, requiring specific tools and products. With this model, all these problems vanish, allowing perfect cleaning of every part of the toilet. Another distinctive characteristic is the peculiarity of the exhaust flow. The water flows with greater force and in a symmetrical manner, cleaning all the internal areas and ensuring maximum hygiene: a fundamental requirement for a bathroom.

Un bagno che sappia adattarsi alle vostre esigenze è fatto di elementi modulari come nel caso del lavabo con semicolonna che vi consente di ricreare liberamente il vostro bagno.

ZERO

Serie / Series

Gli spazi e sensazioni rubate alla zona living. Finalmente il bagno diventa un ambiente dove i ritmi rallentano e ci si concede un momento di intimità. I bordi diventano più spessi per la serie Zero senza però risultare pesanti, anzi, esprimono solidità e compattezza. I sanitari Zero hanno linee morbide ed arrotondate e un'attenzione particolare all'ambiente, servono infatti solo 3/6 lt di acqua per ogni scarico.

Spaces and sensations stolen from the living area. Finally the bathroom becomes an environment where rhythms slow down and a moment of intimacy is possible. The edges become thicker for the Zero series without being heavy. On the contrary, they express solidity and compactness. Zero sanitary ware has soft and rounded lines and special attention to the environment. In fact only 3/6 liters of water are needed for each drain.

La collezione di lavabi Luna è caratterizzata da bordi sottili, dal design lineare che li rende facilmente inseribili anche in ambienti bagno di piccole dimensioni. Il troppopieno viene meno per non rovinare l'estetica del bacino.

The collection of Luna washbasins is characterized by thin edges, with a linear design that makes them easy to insert even in small bathrooms. The overflow is reduced so as not to ruin the aesthetics of the basin.

Da una fusione di forme e proporzioni geometriche nascono i sanitari a terra filo muro con scarico universale della serie Luna. Grazie alla plasticità della ceramica diventano i protagonisti assoluti dell'ambiente bagno.

Luna series of the back-to-wall sanitary ware with universal discharge is borne from the fusion of geometric shapes and sinuous curves. Thanks to the fluidity of the ceramics they become the absolute centerpiece of the bathroom.

I nuovi sistemi di risciacquo del water Laguna assicurano più igiene, risparmiando acqua. Anche con le ridotte quantità d'acqua utilizzate dai vasi di ultima generazione, mediamente di 3/4,5 litri a scarico, si può ottenere un risciacquo efficace grazie all'assenza della brida, cioè il bordo interno ricurvo dei water tradizionali per il quale passa il risciacquo d'acqua.

The new Laguna water rinsing systems ensure more hygiene, saving water. Even with the reduced amounts of water used by the latest generation vessels, on average 3-4,5 liters at discharge, effective rinsing can be obtained thanks to the absence of the rim.

SENZA BRIDA E FISSAGGIO NASCOSTO

Ricerca e innovazione conducono gli interior designer a creare complementi attenti all'ambiente, ergonomici e funzionali al comfort quotidiano. La scelta dei sanitari sospesi con fissaggio nascosto aumenta la spazialità del bagno e consente di nascondere antiestetici tubazioni a vista, oltre a semplificare le operazioni di pulizia del pavimento. Il wc inoltre è progettato con attenzione all'ambiente, grazie all'esclusiva tecnologia "Rimless" che permette un minore spreco d'acqua di scarico per una massima praticità di pulizia. Il copriwater è slim in linea con il sanitario.

NO-RIM AND HIDDEN FASTENING

Research and innovation lead interior designers to create environmentally-friendly, ergonomic and functional accessories for everyday comfort. The choice of suspended sanitary fixtures with hidden fixing increases the spaciousness of the bathroom and allows you to hide unsightly exposed pipes, in addition to simplifying floor cleaning tasks. Furthermore, the toilet is designed with attention to the environment, thanks to the exclusive "Rimless" technology that allows reduced waste water for maximum cleaning convenience. The toilet seat is slim in line with the fixture.

Bring a touch of luxury to your bathroom with this countertop washbasin with modern and essential ceramic lines. Its timeless design is essential and elegant.

L'acqua è una risorsa preziosa e fondamentale, utilizzarla con parsimonia è importante come doverosa forma di rispetto per l'ambiente. Nelle nostre case, la stanza in cui utilizziamo più acqua è ovviamente il bagno e solamente lo scarico del WC consuma in media 10 litri ogni volta che viene azionato. Questo sanitario con scarico universale permette di scaricare solamente 3/6 litri di acqua ottenendo un risparmio idrico non indifferente.

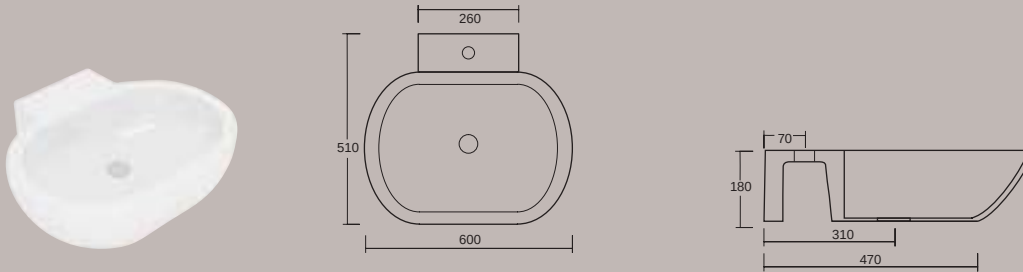

Water is a precious and fundamental resource. Using it sparingly is important as a necessary form of respect for the environment. In our homes, the room in which we use the most water is, of course, the bathroom. Just the toilet drain consumes an average of 10 liters each time it is operated. This fixture with universal discharge allows to flush only 3/6 liters of water, a considerable savings.

ONDA

Serie / Series

I lavabi diventano il punto focale del bagno grazie alle sue linee pulite e design vintage. Un design che trae ispirazione dalla storia e ne ridisegna i motivi tradizionali con il segno e la funzionalità dell'oggi. La serie Onda riprende lo stile primo '900, ne richiama le atmosfere ma in una visione pienamente contemporanea.

Washbasins become the focal point of the bathroom thanks to its clean lines and vintage design. A design that draws inspiration from history and redesigns its traditional motifs with the signature and functionality of today. The Onda series takes up the style of the early 1900s, recalling the heritage but in a fully contemporary vision.

YOUNG

Serie / Series

La serie Young è una collezione basic, ciò nonostante è composta di ceramica di ottima qualità smaltata bianca o champagne che dà un tocco senza tempo all'ambiente bagno. Gli scarichi dei wc possono essere a parete oppure a pavimento, una scelta perfetta se si devono adattare gli scarichi che si usavano tanti anni fa ed in molti casi ancora oggi.

The Young series is a simple collection with a traditional floor installation, with optional wall or floor drain, (perfect for normal drains that were used many years ago and sometimes even today). Nevertheless, it is composed of high quality enameled Champagne that gives a timeless touch to the bathroom.

COLOR CHAMPAGNE

Lo champagne è un colore dal fascino assoluto e senza tempo, praticamente non passerà mai di moda. Si tratta di una tonalità rilassante, con riflessi luminosi di oro e avorio. Inoltre, se il vostro bagno è di piccole dimensioni, i sanitari e lavabi champagne Young possono contribuire a renderlo più spazioso. È vero, magari sarà solo una semplice illusione ottica, ma sono sempre i particolari che fanno la differenza.

CHAMPAGNE COLOR

Champagne is an absolutely charming and timeless color always in style. It is a relaxing shade with bright reflections of gold and ivory. Furthermore, if your bathroom is small, the Young champagne washbasins and washbasins can help make it more spacious. Even if only a simple optical illusion, it's always the details that make the difference.

I sanitari sospesi sono decisamente più igienici rispetto di quelli a terra, infatti, è possibile pulire ogni spazio intorno al sanitario non avendo punti di contatto con il pavimento.

The suspended sanitary ware is decidedly more hygienic than floor mounted versions. In fact, it is possible to clean every space around the sanitary area without having points of contact with the floor.
